CLASSIFICATION

TO \_\_\_\_\_

DATE: 1 November 1955

25X1

FROM : Chief, \_\_\_\_\_

25X1

SUBJECT: GENERAL— Operational/Engineering

SPECIFIC— Crystal-Controlled Converters

REFERENCE: \_\_\_\_\_

25X1

1. Discussions with \_\_\_\_\_ during their recent visit revealed that R and D personnel have developed a transistorized converter which meets the requirements outlined in the reference. This news was exceedingly pleasant to hear.

25X1

2. It is requested that 12 of these converters be produced for \_\_\_\_\_ use in the foreseeable future. The first of the 12 should begin to arrive during the month of December although receipt in November would be desirable. There are several persons now being trained in the reception of broadcasts for when these converters could be used.

25X1

3. \_\_\_\_\_ indicated that transistor procurement problems might delay production of the converters. He stated, however, that certain equipments now under development for ELINT would utilize the same transistors. Since the ELINT requirement would not develop before the spring of 1956, it might be possible to use some few of the transistors now on hand for ELINT. It is recommended that this be done.

25X1

4. Per agreement with \_\_\_\_\_, we will proceed with the purchase of 12 additional, interim units \_\_\_\_\_, sources. These will not be transistorized but will, however, be US-sterile.
